OOC Cougar

This month we are featuring the recently christened Opielok Offshore Carriers platform supply vessel OOC Cougar. The UT 755LN design was built at the Aker Shipyard in Aukra, Norway. The christening at Aalesund later featured a short trip to the Ona island as well as a festive dinner under the midnight summer sun.

The British flagged vessel will have Fi-Fi 1, an LOA of 71.5m, 3240 tonnes deadweight and a loaded draft of 5.8metres.

OSM Schiffart GmbH & Cie KG will be technical managers whilst Aries Offshore will be commercial managers.
